

Ortho Spreader with Slotted Tips and Measuring Scale

Designed by Jason Bariteau, MD

A lamina spreader with a very thin closed profile, designed to enable distraction in tight joint spaces like the subtalar and talonavicular joints

Measuring scale in millimeters on the spreader handle

PRODUCT NO:

1841

Overall Length: 6.75" (17,1 cm)

Prong Length: .5" (12,7 mm)

Measuring Scale: 10 mm to 35 mm

Locations for use
of Ortho Spreader

*** Accuracy Statement for devices with a measuring function:**

Devices with a measuring function are considered non-critical, non-calibrated, and are intended for reference-only measurements. While it provides a helpful visual guide for relative measurements, it is not calibrated to specific precision standards. Measurements taken with this device should not be considered accurate enough for critical applications requiring strict dimensional tolerances. General manufacturing tolerances of $\pm 1\%$ at each graduation, or 2% of the full scale apply, but no conformance qualifications are provided or implied.
