

O'Brien Bone Clamps

Designed by Todd O'Brien, DPM

Designed for use in stabilization of a fracture or osteotomy

Allows for placement of the bone clamp where it can best stabilize bone fragments. The drill guide allows for screw placement through the top of the clamp. Measuring scale on the handle helps eliminate the use of a depth gauge.

Integrated drill guide and bone diameter gauge

PRODUCT NO:

1890-01 [Small]
Drill Guide Diameter: 8 mm
(accommodates up to 4 mm screw)
Measuring scale* from 8 mm to 30 mm
Overall Length: 6" (15,2 cm)

*** Accuracy Statement for devices with a measuring function:**

Devices with a measuring function are considered non-critical, non-calibrated, and are intended for reference-only measurements. While it provides a helpful visual guide for relative measurements, it is not calibrated to specific precision standards. Measurements taken with this device should not be considered accurate enough for critical applications requiring strict dimensional tolerances. General manufacturing tolerances of $\pm 1\%$ at each graduation, or 2% of the full scale apply, but no conformance qualifications are provided or implied.
